

CASE STUDY: MINDCHAMPS SINGAPORE

“ESET has visibly enhanced MindChamps’ computer security with a good level of protection and detection rate. The reasonable speed of scanning and the provision of supportive technical services gives me confidence in ESET,”

Harvey Sim, Senior Manager, MindChamps Information Technology

MINDCHAMPS SINGAPORE

THE COMPANY

MindChamps is an international award-winning mind development institute that train students in the Art of Learning How To Learn and the development of their Champion Mindset. With over 60,000 graduates, MindChamps programs empower pre-school to tertiary level students with the latest and most practical strategies to achieve their full potential.

CHALLENGES

An interview with Senior Manager, Harvey Sim from MindChamps Information Technology department revealed that he previously had challenges in protecting endpoint, content filtering, IDS, IPS and allowance of BYOD. Using the previous two versions of another software had caused problems for Harvey as its remote deployment was very manual.

FULFILLED REQUIREMENTS

Hence the Senior Manager stated his expectation of a security solution for MindChamps must include central management, central updates, desktop firewall, antivirus, anti-spam, anti-malware, host-based intrusion protection, auto network location profile switching and is able to support Windows, Mac and Linux. Harvey found ESET Endpoint Security, ESET Remote Administrator and ESET NOD32 Business Edition for Mac as the most suitable product that fulfills these requirements.

THE RESULT

“ESET has visibly enhanced MindChamps’ computer security with a good level of protection and detection rate. The reasonable speed of scanning and the provision of supportive technical services gives me confidence in ESET,” said Harvey Sim.

He added the best ESET feature is to enable tasks running on multiple endpoints through the ESET Remote Administrator. Lastly Harvey recommends the use of ESET as it offers good protection and is efficient when deploying policies.
